

Packaging Kibble for your Stay at Wet Noses

Wet Noses requires the owners to package their dogs' food in a **Ziploc** bag.

One bag is required for each day of their stay.

If you feed AM and PM, you still put the **DAILY** amount in **one bag** and we will use half the bag for each feeding.

Here is what is required:

1. Acquire the **appropriate size Ziploc** bags for the amount of food required. Big dogs will need bigger bags. One bag only per day. Do not split the daily amount in two! You will need a **permanent marker / Sharpie**. All other markers rub off after printing the dog's name, and pens are too thin to see what's written.

2. Clearly print your dog's name **ONLY** on the bag. Do not date the bags. You can add AM/PM under your dog's name if fed AM & PM. Please, no other notes on the bags. We have detailed feeding instructions on file.

3. Fill each bag with the daily amount of food. That's it! Done!

4. If your dog has a mix of canned and kibble for dinner, use the **Sharpie** and put the amount you feed per meal on an open space on the can. Don't write on the lid, as it will be removed.
Eg. $\frac{1}{3}$ rd can per meal, or $\frac{1}{2}$ can with dinner. Canned food is stored in the fridge.
